Enthusiastic developer that hopes to apply my current and future skills to real world solutions. Working with computers has become a habit and second nature to me. Consistently striving to better myself and am open to learning new skills in order to be able to provide a great life for my future family. Whether it is working alone or with a team, I always put forward my best effort to succeed.

Professional Experience

Project Manager Assistant

Young's Communications, LLC, Melbourne, FL

July 2020 - January 2022

- Inspected, corrected, and converted field drawings into office red lines for the first 6 months.
- The remainder of my time there I took red lines and turned them into as-builts for my boss, the project manager.
- I assisted the financial department but inputting most of the information on project orders into our company project order tracker and maintained that the information in this database was correct.
- I also worked within our multiple job trackers in excel to input information such as the start date, end date, costs, and payment.

Warehouse Assistant

Young's Communications, LLC, Melbourne, FL

January 2017 - June 2020

- In the mornings of my work day I recorded the truck number of every truck that left our company yard and any materials and trailers that they took.
- Operated a forklift to unload any materials that were delivered and also loaded company trucks with equipment that they needed, such as fiber reels.
- Assisted in cleaning and organizing the warehouse and surrounded yards to prevent work injuries and clutter.
- Logged what materials had arrived or been taken at the warehouse into our materials tracker through excel.

Education

BBA in Organizational Management

Eastern Florida State College at Melbourne, FL

January 2016 - August 2021

Graduated with a 3.64 GPA and earned a majority of this degree through online classes which by doing so I had to learn to remain focused and not procrastinate. Through this I became more comfortable working with computers and doing my work this way.

Bootcamp in Full Stack Web Development

Columbia Engineering at New York City, NY

January 2022 - April 2022

Through taking this bootcamp I learned javascript as my main coding language. We used the MERN stack quite a bit but also went over HTML, CSS, Handlebars, and SQL. The class was taken through the live-video chat program Zoom and we often worked in groups during activities. We also had to work in groups of 3 or 4 for our main projects which gave us an idea of what it is like to work as a team to create an application.

Certification in React Front to Back 2022

Udemy at Online

April 2022 - May 2022

This is a course I took and earned a certificate in through the website Udemy. Udemy contains a variety of courses with many of them on coding. This course in particular was made by Brad Traversy.

Key Skills

- Javascript
- Computer skills
- MERN
- MS Office
- HTML
- CSS
- Written Communication
- Teamwork
- Teambuilding
- Conflict resolution
